

Author Guidelines for Encyclopedia of Multimedia, 3e

Welcome to **Encyclopedia of Multimedia, 3e**. These Author Guidelines have been compiled to help you write your contribution. Please take the time to read and consider the following suggestions for preparing your manuscript.

The editorial submissions and process will be organized on Meteor.Springer.com. Please use the token link within the invitation email to establish your password. An overview of Meteor and instructions for using the site are available on <http://refworks.springer.com/meteor/>.

Please also visit the project website at <http://encyclopediaofmultimedia.com>.

Once your manuscript is submitted and received, it will be reviewed by Encyclopedia editors for content, and by Springer for proper format and structure. You may be notified to revise and resubmit your contribution(s).

For questions or concerns regarding content, please contact Editors-in-Chief **Borko Furht** at bfurht@fau.edu and **Oge Marques** at omarques@fau.edu. For questions or concerns regarding format and structure or the submissions process, please contact your Springer Associate Editor.

Please keep the following in mind while preparing your contribution:

1. Scientific level of your contribution. Please remember that reference articles are tertiary literature. As such, they contain digested knowledge in an easily accessible format. Contributions should be clear and concise, and provide a comprehensive and up-to-date overview of topics. They should be appropriate for practitioners and academics, as well as graduate students whose expertise may be outside the topics addressed. Please define and explain all specialized terminology and avoid jargon whenever possible.

2. Length, structure, and format of your contribution. For authors of the 2nd edition: An editable version of your contribution may be found on Meteor. Please use as basis for your revision.

The Encyclopedia consists of: **short** entries (minimum 500 words) and **long** entries (up to 5,000 words). **Long entries are preferred.** If you are unsure of your contribution type, please contact the Editors-in-Chief or your section editor.

To ensure cohesive and uniform formatting throughout the Encyclopedia, please adhere to the following structure:

Short entries	Long entries
Synonyms Definition Cross-References (related chapters selected from the table of contents) References (restricted to the minimum number of essential references compatible with good scientific practice)	Synonyms Definition Introduction Main Text (headings chosen by authors) Conclusion Cross-References References

Please use Word to prepare your contribution. LaTeX, accompanied by pdf, is also acceptable. Final formatting and layout will be performed by Springer, but do clearly define and organize the elements of your contribution.

Additionally,

- double space and use a common font such as Arial or Times, in 12 point. Include page numbers at the bottom of each page.
- do not use tabs or special spacing for emphasis or design as these may be lost in the final formatting. To *accentuate* special parts of the text, please use *italics*.
- please use the equation editor for equations, the table function to generate tables, and the special character function to insert special characters (Greek letters, symbols, etc.).
- Use American spelling and avoid colloquial language and unnecessary foreign words. Also, **avoid using the first person voice**.
- names, terms, abbreviations, etc. should be spelled consistently throughout the whole text (including figures and tables). Also, explain any acronyms and abbreviations.

Please do not change the agreed title of your contribution without first contacting the Editors-in-Chief or the Springer Associate Editor.

3. Citations and references. Please use the number system, e.g., “[9]” for citations within the text and the American Physical Society (APS) style for references (for examples, please see [HERE](#)). Please list references in numerical order or in the order they are cited within the text. Please do not use footnotes or endnotes.

4. Figures and tables. Do not embed figures! Please submit figures as separate image files (JPG/JPEG, GIF, PNG, EPS, or TIFF). The minimum resolution should be 300 dpi for photographs, 1,200 dpi for drawings. Please do not use figures from the internet as the resolution would not be high enough. Please indicate/include in your chapter text the following: 1) the placement of image files, and 2) an explanatory legend.

Color figures may be submitted. All figures and illustrations will appear in color online. Please note there may be restrictions for color use in the print version; therefore, we advise that you create art that can be readily understood in both settings, e.g., using different line types (broken dashes and solid lines) as well as different color shades to plot lines. Please do not make reference to color elements in the text.

Tables may be placed within the text. Please number and include title and explanatory legend.

5. Permissions. Please be aware that authors are responsible for securing permissions from the copyright holder to use works or figures from other sources. Please use the permissions form provided by Springer.
